

Personal Protective Equipment (PPE) for Patients with Suspected or Confirmed COVID-19

¹ **Aerosol Generating Procedures:** Examples include intubation, non-invasive ventilation, CPR, bronchoscopy, open suction, nasotracheal suction, nebs.

² **Trained Observation:** Since some patient room doors do not have a window, observation of doffing may not always be possible.

PPE for Specimen Collection: Nasopharyngeal swabs often generate a strong cough reflex. Standard/Contact/Droplet precautions are recommended.

More Information: For testing criteria and detailed information about PPE recommendations for suspected or confirmed COVID-19 cases, please visit our [UW Medicine COVID-19 Website](#)
